FIRST STEPS With adaguc/viewer.
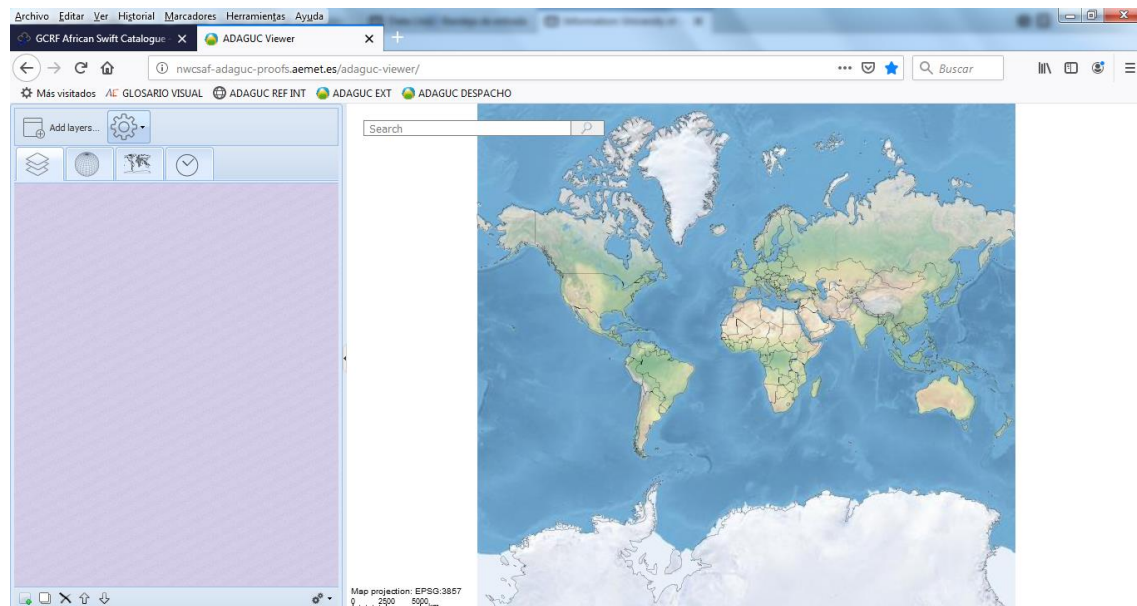

Conect to: http://nwcsaf-adaguc-proofs.aemet.es/adaguc-viewer/
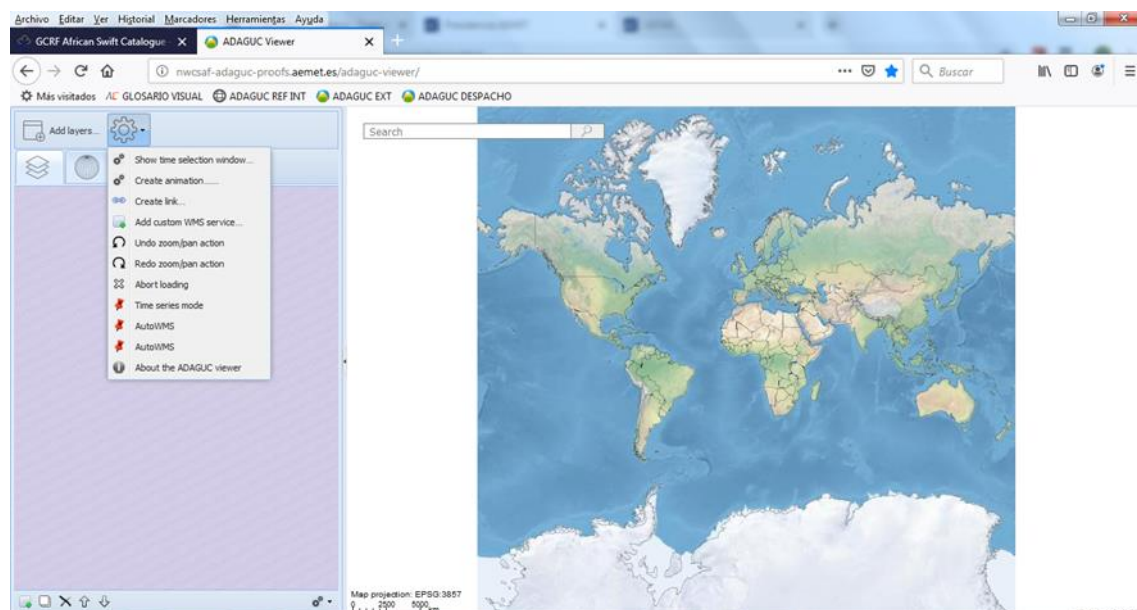

The steps are summarized below

Click the wheel > click AutoWMS > click adaguc::datasets > choose the layer > click the chosen right image

Now step by step. Your first screen will not have data on the map. To add data to the map, please follow the steps.

# STEP1: Click on the the gear wheel.

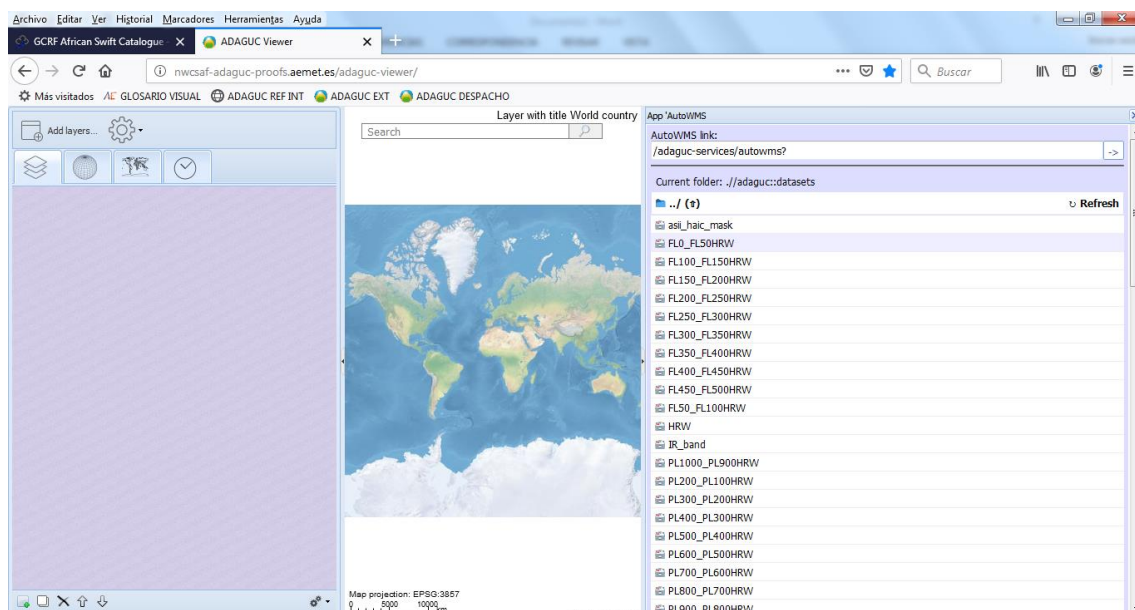

A menu is displayed under the wheel

STEP2: Click on AutoWMS

When autoWMS is clicked, a panel is displayed on the right side of the screen, on this panel click on adaguc::datasets, usually it is the last item.

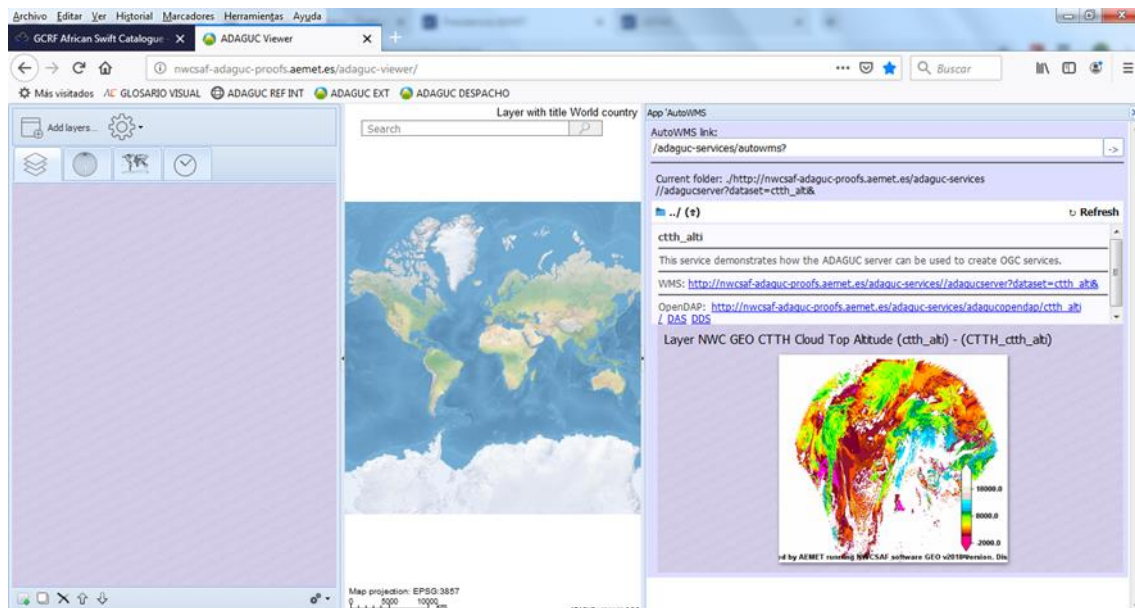

STEP3: click on adaguc::datasets

When adaguc::datasets is clicked, the right panel will change showing all the available layers
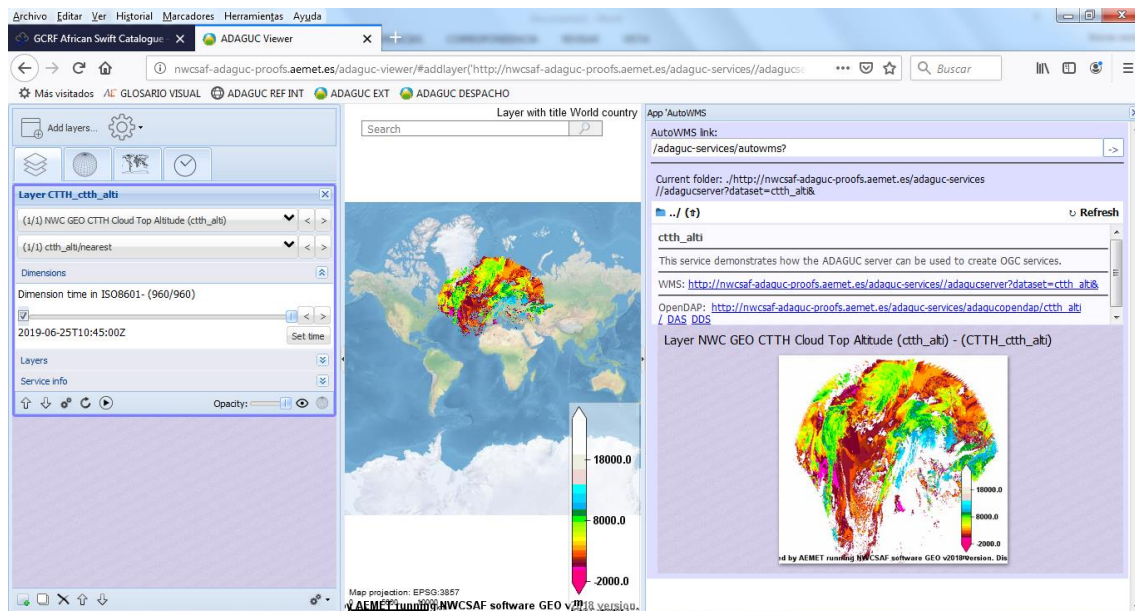

STEP4 Click on the layer that you want to display.

Here ctth_alti is selected, and you can see a screen like the following

STEP5 Click on the chosen image.

The layer could contain more than one sublayer, clicking on one image put this image over the map and shows on the left panel the animation and layer control panel.

FOLOWING STEPS: ADD MORE LAYERS.

Repeat step4 and step5, to add more layers. The lateral panels can be collapsed. You can also animate the plots...
